Our values focus this half term is

Humility

Hi everyone ,

I hope you all a lovely holiday last week, it's so lovely to see you all back ready for our last half term of hard work before the summer holidays.

This week we have all been learning about the Queen. I teach music across the School and each year group have learnt how to play the National anthem on the glockenspiels. During singing assembly, this afternoon, a selection of children from each class performed to the school, which they really enjoyed doing and worked hard to get their part of the song right.

I hope you all have a lovely weekend.

Take care, 😊

Miss Bennett - Teaching Assistant

Please remember to report your child's absence via telephone to the school office on the morning of their absence.

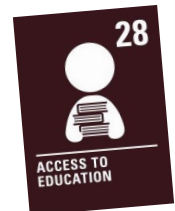

ATTENDANCE

Pride is concerned with who is right.

Humility is concerned with what is right.

UNICEF Rights of the Child

Article 28: Access to education

Every child has the right to an education. Primary education should be free. Secondary and higher education should be available to every child.

Children should be encouraged to go to school to the highest level possible. Discipline in schools should respect children's rights and never use violence.

We will be holding an e-safety workshop in conjunction with the local PCSOs for YEAR 6 children and their parents on June 15th.

In this session we will look at different websites that are potentially harmful for the children and how we can keep the children safe and educate them of the dangers of a range of online content.

It is important as many parents attend the workshop as possible as the children are at an age and stage where they are exploring online content independently and making choices based on what they are seeing and hearing.

Please look out next week for a flyer with more information.

Electricity

Year 6 Science Trip...

On Tuesday Year 6 visited the Thinktank science museum to introduce their new science topic, 'Electricity'. The children took part in a workshop where they carried out experiments with static and current electricity as well as becoming scientists from history. They learn that humans are great conductors of electricity and became a human circuit, passing electricity around to light a lamp. Following the workshop, they had time to explore much more including the science garden. Everyone enjoyed it but were very tired by the end of the day.
